

With all of the formulas, and systems, and “right” way to build a business, I’ve discovered an unsexy truth: business doesn’t have to be so dang hard.

But what would you do with all of that time spent doing what the gurus tell you to do? What could you create if you weren’t worrying, wondering, hustling, and pushing yourself to go faster and DO more?

What if it can be way easier? Way more joyful? And yes, even more magical.

Welcome to the world of Business Alchemy.

I’m your guide, Angella Johnson –
rebel. intuitive strategist. wordsmith. marketing nerd. truth teller.

I deeply care about people making great money doing the work they love without the hustle and the hype.

On the following page, you’ll see the simple elements of Business Alchemy.

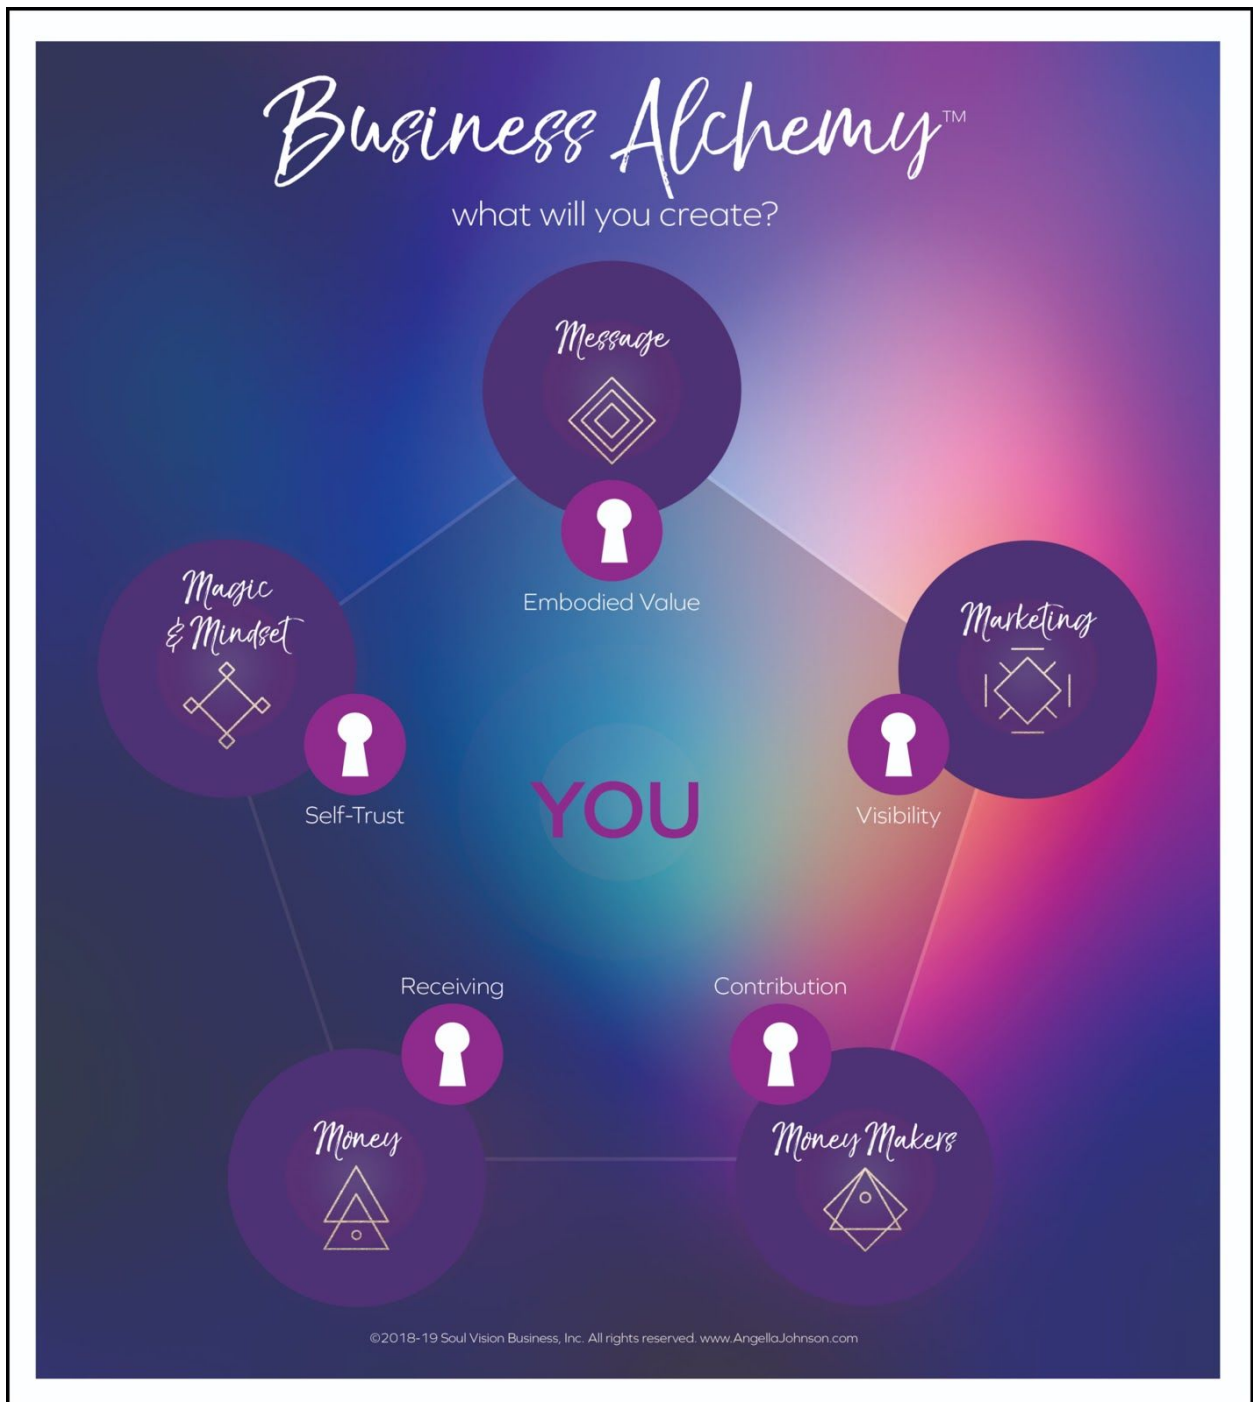

What is alchemy? It’s taking basic elements and turning it into gold. I believe that there is gold in everyone’s business. However, that gold is buried under complication, unnecessary and misaligned strategies, glorified hustle that is really just delayed burnout and more.

After burning down my *almost multiple 6-figure business in 2012 to create something I actually enjoyed, I was pleasantly surprised that my desire for more joy, ease, and magic WHILE making great money was not only possible, but I was creating it.

I’ve helped clients around the world do the same thing.
